CONTENTS

No. 1

B. BERGSTRAND: Aminolysis and hydrolysis of formanilide in water solutions. Part V. Influence of the substituent in *para*-position 1

U. HILLGREN and I. NAHRINGBAUER: Mass transfer across liquid-liquid interfaces. Part III. The accuracy and precision of the measurements of mass-transfer coefficients obtained by an automatic falling-drop apparatus 17

G. KYEREMATEN, E. MEDINA, D. SAAVEDRA and F. SANDBERG: Antidiarrhoeal properties of *Dorstenia drakena* L. 31

G. KYEREMATEN, M. HAGOS, G. WEERATUNGA and F. SANDBERG: The cardiac glycosides of *Thevetia ovata* A.DC. and *Thevetia Nereifolia* Juss. ex Stend. 37

A. SUENAGA, H. NAKAGAWA, M.-T. HUANG, Y. IMAMURA, M. OTAGIRI and H. ICHIBAGASE: Biopharmaceutical studies on pyridinolcarbamate. Part V. Effect of repeated administration of pyridinolcarbamate on the renal excretion of sulbenicillin in rabbits 45

M. N. ABOUL-ENEIN, S. M. EL-DIFRAWY, K. Z. GADALLA, A. A. MAKHLOUF and M. E. EL-SAYED: Synthesis of 2-methoxybenzylpyrrolidines of analgesic potential 53

J. E. KOUNTOURELLIS and A. RAPTOULI: X-ray powder diffraction data for propantheline bromide 59

K. LÖVGREN: Adrenergic agonists and antagonists. Structure-activity relationship studies of the side chains of arylethanolamines and aryloxypropanolamines 63

P. K. PERERA: Phytochemical and pharmacological studies on *Tabernaemontana dichotoma* 64

N. E. STJERNSTRÖM, A. WÄGNER, G. BONDESSON and T. HÖGBERG: Potential hypolipidemic agents. Part XXI. Stereochemistry of 2-(4-dibenzofuranyloxy)-2-methylpropionic acid and related compounds. **Addendum** 64

No. 2

U. HACKSELL, L.-E. ARVIDSSON, A. M. JOHANSSON, J. L. G. NILSSON, D. SANCHEZ, B. ANDERSSON, P. LINDBERG, H. WIKSTRÖM, S. HJORT, K. SVENSSON and A. CARLSSON: 5-Hydroxy-2-methyl-2-(di-*n*-propylamino) tetralin: Synthesis and central pharmacological effects 65

H. WIKSTRÖM, S. SUNDELL and M. LUNDMARK: Determination of absolute configuration of a series of compounds with actions on dopamine receptors in the central nervous system 75

K. GUSTAVII and A. FURÄNGEN: Extractive alkylation of organic acids. Part IX. Studies on the alkylation of carboxylic acids and the subsequent hydrolysis of the formed ester 89

A. WÄGNER, B. STENSLAND, I. CSÖREGH and T. DE PAULIS: Molecular structure and absolute configuration of the hydrochloride of a novel dopamine receptor antagonist: 2*S*(−)-5-chloro-3-ethyl-*N*-[(1-ethyl-2-pyrrolidinyl)-methyl]-6-methoxysalicylamide 101

E. EHRIN: The synthesis of carbon-11 labelled compounds for biomedical applications using positron emission tomography 111

L. BERGSTRÖM: Enkephalin and substance P dynamics studied in morphine addiction and potential respiratory failure 112

No. 3

J. STRÖMBOM, F. SANDBERG and L. DENCKER: Studies on absorption and distribution of ginsenoside R_{g-1} by wholebody autoradiography and chromatography 113

T. HÖGBERG, J. LUNDSTRÖM and B. ULFF: Synthesis and spectroscopic characterization of pyridyl *N*-oxidized zimeldine metabolites 123

B. NORÉN, S. STRÖMBERG, Ö.ERICSSON, B. VANGBO, M. GRÄLLS, L. WIDLUND and B. LINDEKE: Biotransformation of terodiline. Part II. Disposition in the male rat. Identification of metabolites in rat urine and rat liver microsomes by mass spectrometry 131

B.-R. TOLF, R. DAHLBOM, Å. ÅKESSON and H. THEORELL: Synthetic inhibitors of alcohol dehydrogenase. Pyrazoles containing polar groups directly attached to the pyrazole ring in the 4-position 147

L. TURAKKA and M. SIEPPI: Influence of drug concentration and ageing on the release of salicylic acid from a Carbopol hydrogel 157

H. VROMANS, A. H. DE BOER, G. K. BOLHUIS, C. F. LERK and K. D. KUSSENDRAGER: Studies on tabletting properties of lactose. Part I. The effect of initial particle size on bindning properties and dehydration characteristics of lactose 163

G. RAGNARSSON: Evaluation of tabletting properties in preformulation and early formulation work 173

L. WEIDOLF: Metabolism of felodipine. Analytical methods for qualitative and quantitative studies 174

E. ABDUL-MALER HAASOUN: Teratogenicity and *in vitro* fetal thymus toxicity of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin and its congeners: segregation with the *Ah* locus 175

No. 4

G. ALDERBORN: Studies on direct compression of tablets. Part XV. An evaluation of the surface area obtained by permeametry measurements of tablets .. 177

U. HILLGREN and I. NAHRINGBAUER: Mass transfer across liquid-liquid interfaces. Part IV. The effects of acidity and distribution constants and choice of direction on mass transfer of some benzylamine derivatives 185

A. FURÄNGEN: Extractive alkylation of organic acids. Part X. Kinetic studies on the alkylation of carboxylic acids with UV-absorbing alkylating agents ... 197

T. LOFTSSON: The effect of ionization on partition coefficients and topical delivery 209

H. NYQVIST and T. WADSTEN: Structure-related variation in epimer ratio and solvent content of bacampicillin hydrochloride 215

H. NYQVIST and M. NICKLASSON: Influence of epimer ratio on physicochemical properties of bacampicillin hydrochloride 229

C. LARSSON: Nicotinic receptors in the central nervous system. Methodological and functional aspects 237

P. O. EDLUND: Trace analysis of drugs, cathecholamines and their metabolites in biological samples by gas- and liquid chromatography 238

A. LARSSON: Herpesvirus-induced enzymes as targets for antiviral compounds 239

No. 5

A. FURÄNGEN and K. GUSTAVII: Extractive alkylation of organic acids. Part XI. Kinetic studies on the halogen exchange between phenacyl bromide and chloride 241

A. M. WELI, B. BACKLUND HÖÖK and B. LINDEKE: *N*-Dealkylation and *N*-oxidation of two α-methyl-substituted pargyline analogues in rat liver microsomes 249

U. HILLGREN and I. NAHRINGBAUER: Mass transfer across liquid-liquid interfaces. Part V. Simultaneous mass transfer of lidocaine and alprenolol from water to cyclohexane 265

M. H. FARAH and G. SAMUELSSON: Isolation of histamine from leaves of *Suaeda monoica* 275

M. S. KARABIT, O. T. JUNESKANS and P. LUNDGREN: Studies on the evaluation of preservative efficacy. Part I. The determination of antimicrobial characteristics of phenol 281

J.-O. WALTERSSON and P. LUNDGREN: The effect of mechanical comminution on drug stability 291

A. I. Y. KHAYAT: Disposition of metallic mercury vapor and mercuric chloride in adult and fetal tissues 301

J. GABRIELSSON: Modeling of drugs in pregnancy 303

L.-E. ARVIDSSON: Agents stimulating central 5-hydroxytryptamine receptors 304

No. 6

C. AHLNECK and P. LUNDGREN: Methods for the evaluation of solid state stability and compatibility between drug and excipient 305

O. CAMBER and P. LUNDGREN: Diffusion of some low molecular weight compounds in sodium hyaluronate 315

U. H. LINDBERG and B. ÅKERMAN: Potential antiarrhythmic agents. Part II. Antiarrhythmic activity of basic *N*-(substituted phenyl and benzyl)dipeptides 321

O. CAMBER: An *in vitro* model for determination of drug permeability through the cornea 335

M. E. JOHANSSON: Investigation of the mixing time dependence of the lubricating properties of granular and powdered magnesium stearate 343

G. LIDGREN, L. ANDERSSON and L. BOHLIN: Studies of Swedish marine organisms. Part IV. Screening of biological activity 351

A. WIRBRANT: Regulatory aspects of permeation through artificial membranes 357

M. TAMMELA: Tissue localization of some organic and inorganic cations 358

J. IBRAHEEM: Pharmacokinetics of ergotamine with special emphasis on bioavailability 360

K. GUSTAVII and A. FURÄNGEN: Extractive alkylation of organic acids. Part IX. Errata 361
